

Self isolation social story

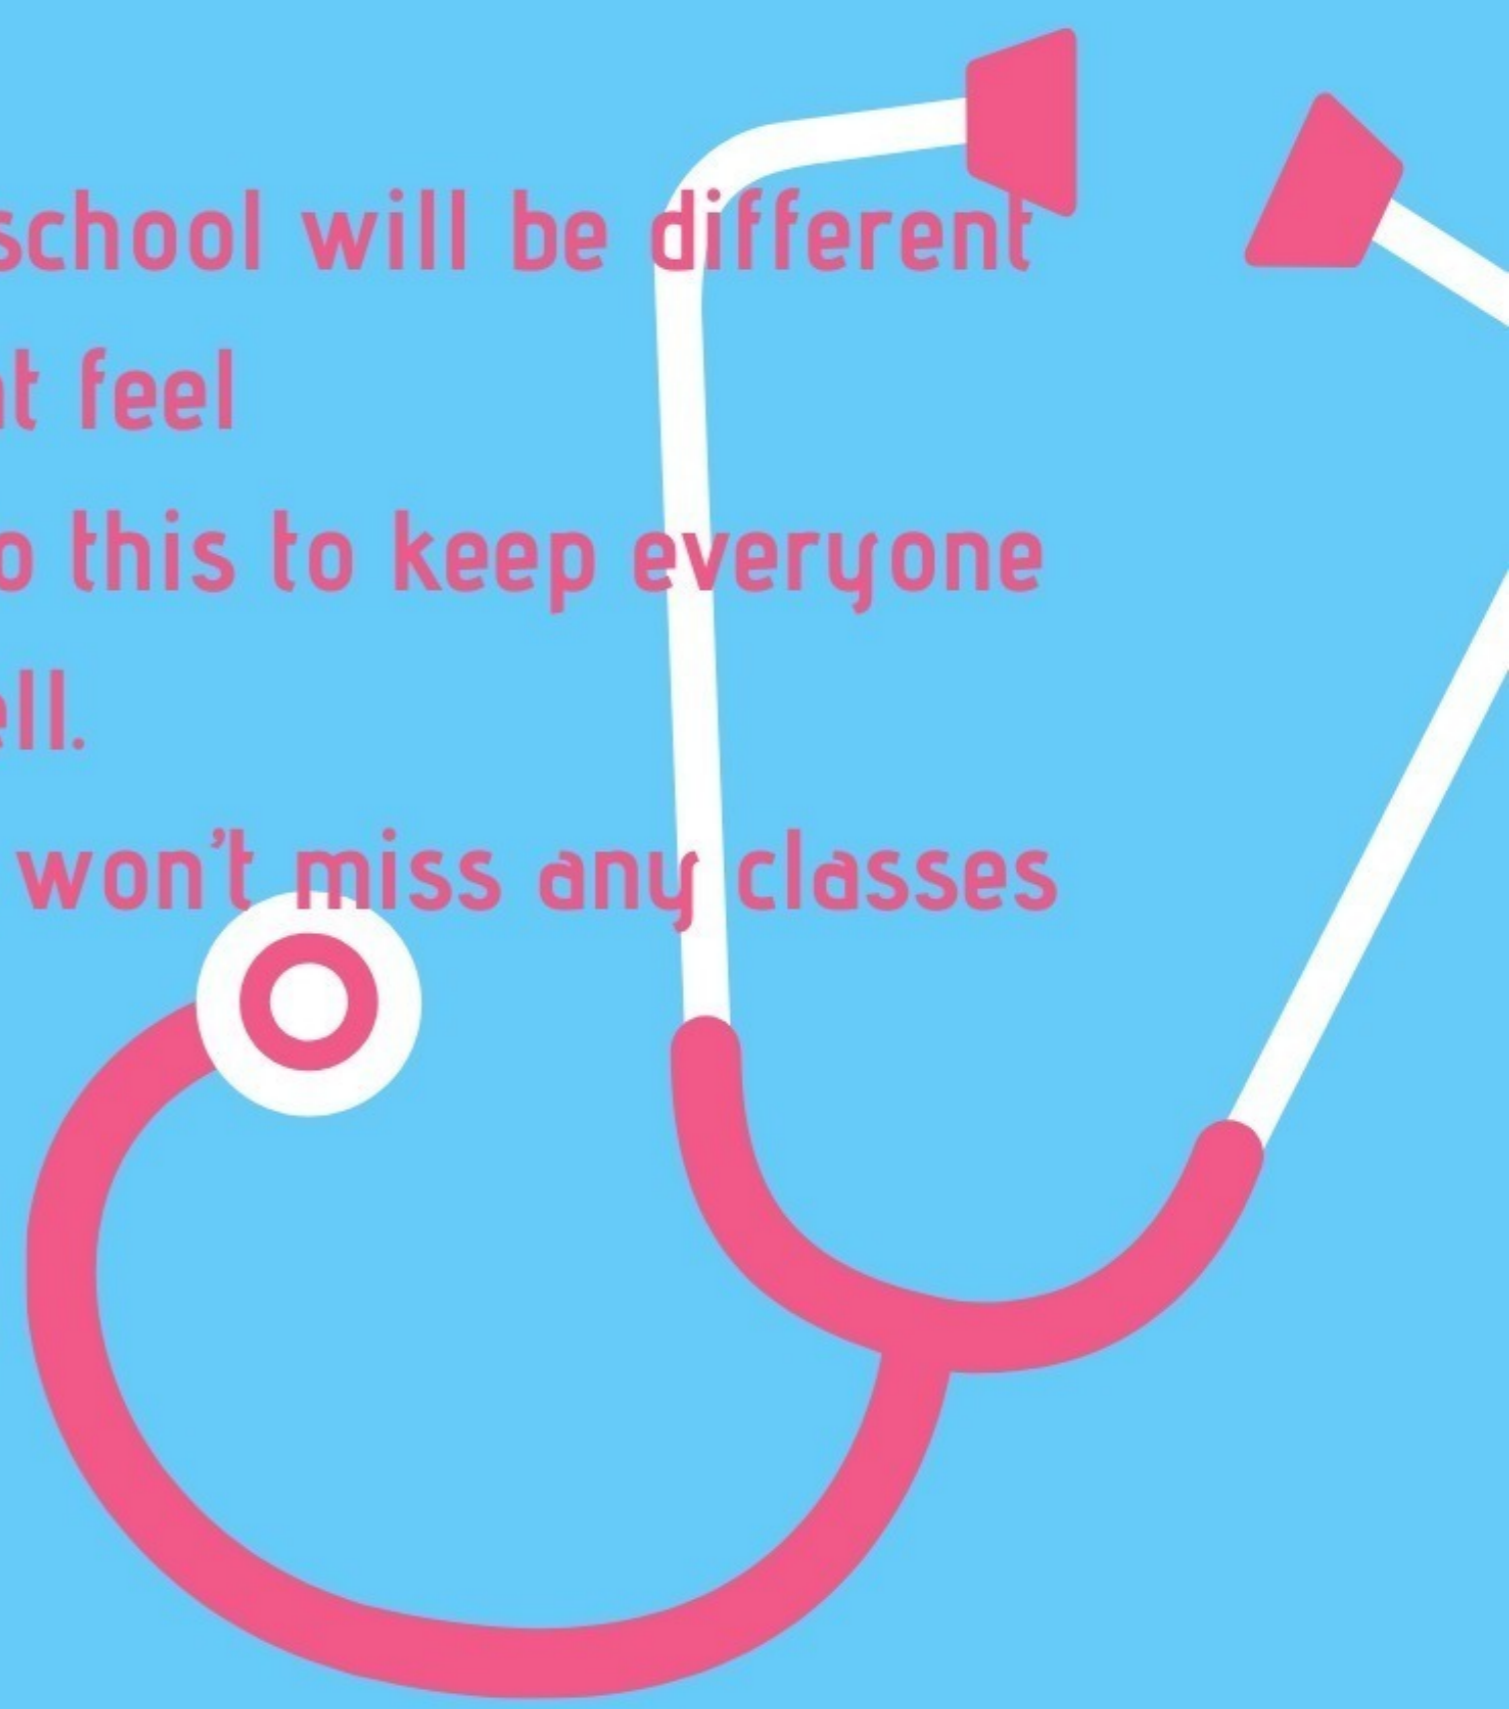

Self-isolation is when you must stay indoors and avoid contact with other people. The doctor may advise you or your family do this if you have symptoms of coronavirus.

You can ask your parents/caregivers any questions you have about the coronavirus– this will help you cope with any worries you may have. This might help you feel better.

Your daily routine of going to school will be different and this might feel stressful. This is ok, we must do this to keep everyone feeling well.

Everyone is off school and you won't miss any classes or fun.

Dos and Don'ts

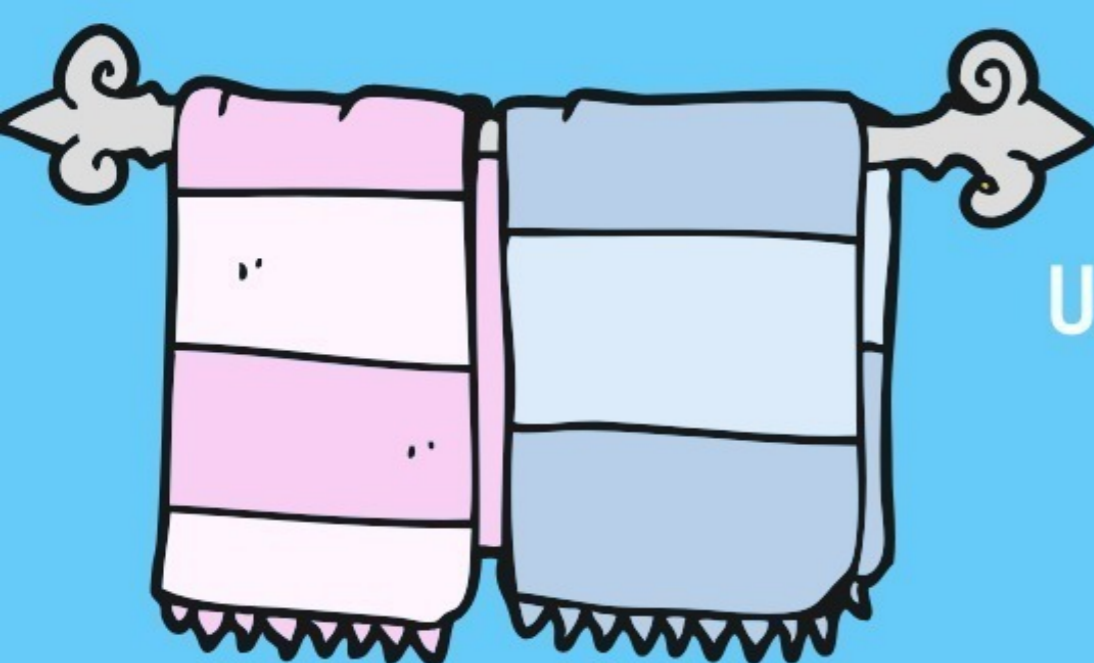

DO

Stay at home.
Keep the window open if you can.

Cover your coughs or sneezes using a tissue or your elbow.

Wash your hands regularly. Wash for 20 seconds.

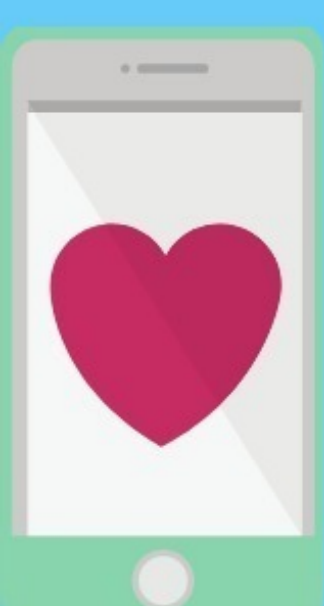

Use your own towel and don't share a towel with others.

DON'T

Don't share drinks, cups or other items.

Don't shake hands with anyone – this will help prevent the spread of the coronavirus. Instead – you can wave.

Don't leave the house and meet up with friends. You can phone or text them, and you will see them soon.

As you cannot attend school – your parents/caregivers will give you activities to help keep busy –you might be able to do some fun activities.

Your teacher might also have given you some school work to do while school is closed.

When the doctors say that it is ok, you can spend more time around other people but keep being careful with handwashing and hygiene.

When schools are reopened and you are feeling ok, you can go back to school!
